

Vixen Plane

Make handle from wood (Fine Grained-Walnut, Maple etc.), nylon, plexiglass, phenolic. I used .5" thick plexiglass.

Shape - whatever feels good in your hand.

Cut 3" off the end of a vixen file with a Dremel or die grinder.

Use Heavy Duty double sided picture hanging tape (Staples, Office Depot)

Attach file to handle & clamp (vise) to seat tape into file.

This works better & is more controllable than the whole vixen file.
